

## *New Product Development* Ferrules range extension

Designers and Engineers are discovering new applications for hydraulic power; whether the application is construction, mining, agriculture, manufacturing or transportation, Alfagomma has a compact hose to meet the different needs of the customers.

Alfagomma provides the hose and fitting specification needed for a broad range of application and a high quality, reliable hydraulic hose assembly. Hose and fittings meet global performance standard, designed and manufactured to meet and exceed industry standard including SAE and EN.

Following its **commitment** in serving customers and the **continuous improvement** as a driving force of its R&D Department, **Alfagomma** is making available to the market 3 new ferrules.

### **H1100404-080000**

H1100404 is a **skive ferrule** for **Flexor 4SP**.

Already available for DN 1/4" and 3/8", the **new ferrule** has been designed for Flexor 4SP **1/2"**.

### **H1200202-240000 / H1200202-320000**

H1200202 is a **no-skive ferrule** for Flexor **1SN-R1AT**(EN 853 1SN - SAE 100 R1T) and Flexor **2SN-R2AT** (EN 853 2SN - SAE 100 R2AT).

The **new ferrules** are extending the **advantages of no-skiving** ferrules (no odour, no dust, time-saving) to DN **1 1/2"** and **2"**.
